MEMORANDUM FOR THE DOD POW/MIA CENTRAL DOCUMENTATION OFFICE SUBJECT: Senate Select Committee Request For Correlation

1. Attached, per request of the Senate Select Committee on POW/MIA Affairs dated 13 July 1992, is an NSA input to the correlation of information contained in the approximately 3000 reports delivered under cover of my Memorandum of 9 July 1992 with other related collateral information. This information updates our original correlation provided in May 1992 and is also being provided to DIA for their definitive correlation.

2. In addition, our continuing search through NSA archival storage has resulted in the retrieval of eleven POW/MIA-related product reports/translations issued in 1961 and 1962 (Enclosure 2), 5 of which are relevant to specific POW/MIA cases. These five reports have been incorporated into our POW/MIA correlation study.

## NSA SIGINT CORRELATION STUDY - POW/MIA

(S-CCO) This SIGINT correlation study is an NSA analytical working aid attempting to correlate all available Vietnam War era SIGINT to specific POW/MIA cases. The correlations are based on NSA field site reporting, NSA end product and summary reporting, US forces summaries introduced into SIGINT reporting channels, and (SIGINT) reporting. The correlations are not definitive and require validation by DIA.

(C) Our overall goal in conducting the study was to ensure that all Vietnam War era SIGINT has been scrutinized for any information possibly pertaining to POW/MIA's and all POW/MIA related SIGINT has been provided to DIA to assist in resolving the POW/MIA issue.

(U) This is an ongoing study and consequently this document may be updated due to further analysis or as more information becomes available. Please direct questions on document content to B51 POW/MIA Tiger Team, 963-6270s.

#### NSA SIGINT CORRELATION STUDY - POW/MIA

#### Background:

-(C)- In November 1991, in response to the newly-established Senate Select Committee on POW/MIA Affairs, we initiated a search through records, archives, and computer storage for all data relating to the Vietnam War era POW/MIA issue. The results of previous similar studies were reviewed, and a B51 POW/MIA Tiger Team was formed to concentrate solely on this task.

(S-CCO) Primary emphasis was placed on the retrieval and review of NSA and field site SIGINT reporting during the war years. Over 7.5 million reports were machine scanned, of which, over 30,000 reports potentially relevant to the POW/MIA issue were extracted. These 30,000 plus reports were then manually scanned, and nearly 6,200 were retained for further analysis. Of the 6,200 reports retained, over 4,500 were determined to have information pertaining to U.S. POW/MIA's. Over 1,500 of these reports contained names of, or could be correlated to, individuals who were either lost or taken prisoner during the war.

(C) All correlations are considered initial analysis and are forwarded to DIA for review and further study. At DIA the possible correlations are subjected to an in-depth validation process using all-source information and the official individual case files.

(S-CCO) As of 20 August 1992, we have made 878 possible correlations to U.S. POW/MIA's in SIGINT. Of these 878 individuals, 448 are resolved cases where the individual was a POW and was returned at Operation Homecoming or the individual's remains have been returned or recovered. The remaining 430 cases possibly reflected in SIGINT are, to date, unresolved cases.

NSA SIGINT CORRELATION STUDY - POW/MIA

Utilization:

(U) The following paragraphs will aid the reader in fully understanding the data contained in the correlation study. Note that while all data is listed here on the guide, some data may not be included for any one individual case.

(S-CCO) All entries are listed chronologically. While the Refno (Reference Number) system was intended to be a chronological format, some entries were made after the fact, causing some Refno's to be out of order when listed chronologically. We found that a chronological system, supplemented by the case Refno's was easiest to work.

First entry for each case contains;

- 1) The DIA case Refno
- 2) The individual's name
- 3) The individual's rank
  4) The individual's branch of service
- 5) The individual's status as currently carried by DOD, and date of return if a resolved case (Abbreviations are expanded on next page)

Second entry for each case contains;

- 1) Date of loss
- 2) Country of loss

Third entry for each case contains;

- Vehicle of loss (in most cases an aircraft)
  - 1) Aircraft type
  - Aircraft type nickname
  - 3) Aircraft tail number
  - 4) Aircrew mission callsign

Fourth entry for each case contains; Unit of assignment and base of departure at time of loss (for naval aviators aircraft carrier vice base)

Fifth entry for each case contains; Report serial and report Date/Time Group (DTG)

Subsequent Entries;

Amplifying data. The amplifying data is notated in one or a combination of three formats:

- 1) Summary of information; A concise summary of pertinent information.
- 2) Verbatim extracts from SIGINT reports; Annotated by quotation marks, extracts of pertinent information exactly as reported.
- 3) Analyst's notes; Preceded by "Notes", analyst's comments or analyst's inclusion of pertinent collateral source or background information.
- 4) DIA preliminary assessment; Cases reviewed by DIA to date, along with initial validity assessment.

2/H3/VCK/R39-68 220420z Feb 68 - Note; Loss attributed to SAM.

- Either Refno 1048 or Refno 1049. One unidentified aircraft shot down on 14 Feb and the pilot taken prisoner on the 15th. Two aircraft lost, an F-8E (McMahan) and an F-105D (Elliot). Coordinates tend to support Refno 1049, Elliot as the pilot.

- DIA preliminary assessment; DIA concurs with the initial NSA assessment that this SIGINT possibly relates to this case and adds Refnos 1048 and 1051 as possible candidates for the SIGINT. The SIGINT indicates a plane was possibly shot down in the Thanh Hoa area on the evening of 14 Feb and that a pilot was captured. No beeper or chute was ever seen or heard by wingmen of Refno 1049 however poor visibility may have prevented that. Area mentioned in SIGINT loosely matches 1049. However, the time referenced in the SIGINT does not match Refno 1049 shootdown time. This SIGINT possibly relates to either 1048 or 1051. This SIGINT possibly represents new information regarding Refno 1049 and should be incorporated in an all source position and should be brought to the attention of the Vietnamese to get information regarding Refno 1049.

The type of aircraft, the location, and the day of shoot down are not mentioned. The intercept probably fits a USAF RF-4 (same aircraft type as Refno 1596) which was shot down 10 April.
