

BORIS HAGELIN

\* Stockholm → Sandhamn

Dear Elizebeth and Bill:

Many thanks for your long and as always welcome letters dated June 22, which came to hand this morning. We have noted that you will come directly here<sup>x</sup> from Menton, and save the mud-pack treatment for some later date.

About July 15th would suit us fine, please do not make it much later than that, as we plan to move on to Fryksås ab. July 31. You are of course welcome to come there too.

We have already the tape recorder, and have tried it out. I think that it would be a good thing to take along my typewriter also, although it may give you the same trouble as the French one. But you can always have some fun with Å, Ä & Ö. We have noted that the French workmen are still true to form. I have however arranged for Nyberg to take his vacation later on in July, and to spend them in Menton. And his vacation will probably mean having trouble with the workmen until they really do something about the deficiencies. I arranged this with Sture, when I had your ideas about your movements, so please do not hurry to get away from Menton. As mentioned above, around July 15 would be the best time to come to Sandhamn.

We are going to Stockholm to have dinner with Mr. Edström, our good old /92 years/ friend, who now takes 3 schnapps for luncheon, and the whole works for dinner. To morrow I have dinner with some school friends, and at midnight Annie and myself take the train for Copenhagen, to attend a silver wedding anniversary. We than have to take a late night train again for Södertölje, as Gunnar has his birthday on the 29th. And on the 3rd of July we go to Långängen /suburb of Stockholm where Karl Wilhelm lives/, and sail for Sandhamn aboard the

"Astarte". So you see that we have quite a program, before we settle down to take it easy at Sandhamn.

It was nice to have the news about, and greetings from Anita Warner and the Heddens. We are only sorry that we cannot see them here in Sweden.

From Sture only good news. Except that we cannot enlarge our works at the present location, but this is probably all to the good, as space is limited <sup>there</sup> anyhow. So we have decided to buy a lot /plot?/ in neighbouring Steinhausen, ab. 60.000 sq.feet. Our intention is to keep the headquarters the laboratories and such manufacturing, which has not reached the "mass"production stage at Weinbergstrasse 12.

I am afraid that we have no <sup>more</sup> news, and I think that we should save our discussions re "the book" until we meet in Sandhamn, so will close this letter now, with our very best wishes.

Please write next to Sandhamn, Sweden. That is the complete address.

Affectionately, your old friends

*Annie & John*
