MEMORANDUM FOR AFSA-12

SUBJECT: Comments on proposed AFSA Regulation on Patents

1. The principal question which occurs to me is whether an AFSA Regulation should be promulgated in advance of more detailed information from the Government Patents Board itself. Very little has been issued by the Board so far; an AFSA Regulation may be a bit premature.

2. I understand that the Signal Corps is working on some similar paper for that Service. Perhaps we should wait until we can study the Signal Corps regulation.

3. Recommend deferring action on this for a few weeks. No harm will come from such delay, as the Executive Order is now in effect and covers all interests of the Government.
